Cover Letter

Dear Hiring Manager,

I am a Software Engineer . I hold at College of electrical and computer Engineering in stream of Electronics and Communication Engineering from Adama Science and Technology University and have a Strong foundation in both hardware and software systems, with hands-on skilled in Full Stack Development (JavaScript, React, Node.js, MongoDB, MySQL), networking, and data center infrastructure and Networking & Database Control Room Electrician strengthened my practical skills in troubleshooting, system installation, and operational reliability also I am skilled in IoT Implementations System.

I also hold a Huawei Data Center Certification (V1.5), which enhanced my knowledge of networking, power systems, cooling, and infrastructure management. This combination of software development, electronics, and networking allows me to contribute effectively to modern ICT environments that require both technical depth and adaptability.

I am highly motivated, quick to learn, and eager to apply my skills in a challenging professional environment where I can grow while adding real value to your organization. I would welcome the opportunity to discuss how my background and enthusiasm for technology can support your team.

Thank you for your time and consideration.

Sincerely,
Belaynew Zewdie Ayele

Profile

I am Electrical and Computer Engineer with strong experience in digital electronics, communications systems, and electrical design. Skilled in network installations, Computer Hardware and Software(Java Script, HTML, CSS, React.js, Node.js, MongoDB) Or Full Stack Developer, data center management, MATLAB, microcontroller programming(C++). Proven ability to apply advanced technologies to solve engineering problems, with practical experience across both traditional and modern electrical systems.

Education

BSc. Electronics and Communication Engineering Stream
Adama Science and Technology University, Ethiopia
Oct 2021 – Jun 2025

Work Experience

FM & TV Maintenance Technician
Amhara Media Corporation – Bahir Dar, Ethiopia
Jun 2023 – Sep 2023
- Maintained FM/TV control systems and electrical components
- Conducted inspections and troubleshooting
- Applied MATLAB for programming and system design

Electrician – Database Control Room & Networking
Adama Smart City Administrative Office – Adama, Ethiopia
Jun 2024 – Aug 2024
- Managed database control and network installations

- Implemented wireless communication and security camera systems

Projects

- Smart Waste Management for Ethiopia (2025)
  IoT-enabled smart bins with ThingSpeak for real-time waste monitoring and improved urban cleanliness.
- IoT-Based Patient Monitoring System – Best Project of the Year (2025)
- IoT Patient Monitoring System (2025)
  Designed microcontroller-based system to track patient health metrics in real-time.

Certifications

- Huawei Data Center Course (V1.5) – Infrastructure, networking, power & cooling systems (Feb 2025 – Apr 2025)

Technical Skills

Full Stack Developer | Networking Installation | Network Configurations | Computer Hardware and Software | Network Technician | MATLAB| C++ | AutoCAD | IoT Implementation |Electrician Troubleshooting & Maintenance | Data Center Management Web Application| Fast Learn | Circuit Design
